

# Pre-season Tune-up

## Overview

Getting ready for opening day can be difficult if you lack the time to drive hours to your hunting ground or lack the equipment to get the job done. Wildland Systems has the perfect, hassle-free solution if you experience such dilemmas.

Wildland Systems extends our services in the form of a Pre-season Tune-up. We will address all the concerns that you have leading up to the big day.

We will clean the interior of your blind and give it a thorough inspection/repair. This will include spraying wasp nests, patching leaks, replacing dangerous steps etc. Next, we will make sure your blind is readily accessible in all conditions. We will clear the trail of brush, trim back trees, and apply pesticides to knock down tall grass. Finally, we will address issues that may prevent a shot at that buck you have been waiting on all year; this may include mowing, pesticide applications, and additional tree trimming.

## Summary:

- Blind inspection and maintenance
- Clear access to blind
- Shooting lane improvement

## Costs

*Priced per bid*
